<u>Your task:</u>

Write a GUI program that calculate ticket price. The ticket prices are listed as below:

Category	Price per ticket
Senior (>65)	$7
Adult (15-65)	$12
Child (5-15)	$5

Your GUI application should allow user to select a ticket category (from a set of radio buttons), and enter the number of tickets in to an Entry widget. An info dialog box should display the total charge.
